

ASIAN
DOWNSTREAM SUMMIT

ADS Awards

The Asian Downstream Summit (ADS) is Asia's most influential downstream oil and gas event; A globally recognised brand, ADS brings together senior industry leaders and decision-makers from all across the downstream value chain to discuss the most pertinent issues and challenges that the industry faces today, and what can be done to overcome them.

siEW 2023
SINGAPORE INTERNATIONAL ENERGY WEEK

About the ADS Awards

The **Asian Downstream Summit (ADS) Awards** programme represents a benchmark of excellence for those working in the oil & gas industry.

Held alongside the **Asian Refining Technology Conference (ARTC)**, it is the most prominent awards ceremony for oil & gas in the Asia Pacific industry calendar.

The Aim

The **ADS Awards** programme honours and recognises industry visionaries and companies who have showcased outstanding performance and innovative technologies.

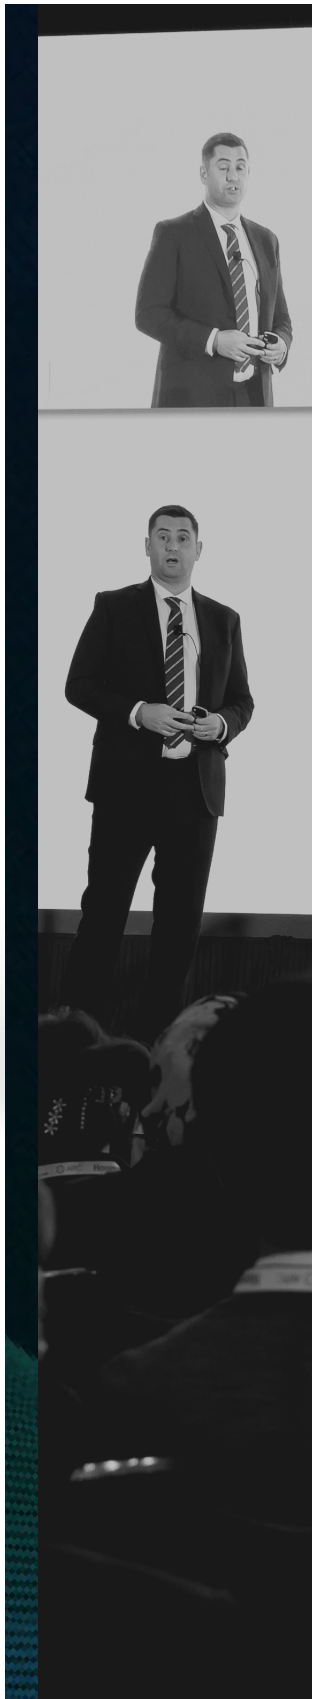

These people and their organisations are enabling the market to become even more efficient through technological development.

Judging Criteria

We invite a panel of judges to take part in our selection process each year. The process remains 100% independent, impartial and with no payment by any organisation or individual.

The decisions made by our global and regional judging panel are final.

Awards Categories

Leader of the Year

As innovation transforms the way we do businesses, the industry needs leader who can adapt to these evolving challenges, and take advantage of the opportunities to optimise their business performance.

The **Leader of the Year** award will commend an outstanding oil and gas leader who has demonstrated exceptional success at the top of their organisation in mentorship, management and operational excellence.

Female Engineer of the Year

The new **Female Engineer of the Year** award is a continuation of the **Asian Downstream Summit's** commitment towards greater diversity in the oil and gas industry. It will recognise a female oil and gas professional who has shown outstanding promise in her field.

The winner of this award is someone who has made, and continues to contribute tremendous value to her organisation's performance and culture.

Young Engineer

The **Young Engineer** award will recognise a young engineer who has shown potential to become a key contributor to the future development of the industry, showcasing outstanding performance and initiative in his/her organisation.

The winner of this award is someone who has a strong potential to reach top management level.

Rising Star of the Year (Vendor)

In a crowded solutions market, it can be hard to differentiate a supplier that stands out! The **Rising Star of the Year** award will single out and commend a supplier who has truly proven to be the best.

The winner of this award is a supplier who stands out from the competition through their exceptional products and services, their value to clients, and their potential for continued future growth and success.

Deadline to Submit Nominations: Friday, 7 July 2023

Awards Categories

Downstream Project of the Year

The **Asian Downstream Summit** holds an established record of bringing together the most senior players in refining, production and petrochemicals.

The **Downstream Project of the Year** award will go to a candidate with the most ambitious, game-changing project in the regional refining and petrochemicals industry.

Sustainable Technology of the Year

We see, now more than ever, how sustainability will determine the future of the oil and gas industry. The **Sustainable Technology of the Year** award will recognise a solution that has used technology to align commercial performance with a positive impact on the environment.

The winner is an organisation that has provided innovative and business-efficient means for oil and gas companies to enhance their performance and improve their ecological standards.

Downstream Plant of the Year

There's no escaping the need and importance of sustainability, and more plants are making the switch to embrace cleaner technologies.

The **Downstream Plant of the Year** award seeks to recognise the plant that has made strides to be the industry's best example of leadership in sustainability.

Innovations in Oil & Gas Digital Technology

This award seeks to recognise the best "digital technology" for delivering operational efficiencies or excellence in refining, petrochemicals, and chemicals.

The winner of this award has consistently been able to help operators reach the highest levels of efficiency and excellence.

For the **Innovations in Oil & Gas Digital Technology** award, judges will look at technologies that have aided in increasing productivity, minimising risks, increasing safety, controlling costs, and aiding organisations in realising their potential for continued growth and future success.

Deadline to Submit Nominations: Friday, 7 July 2023

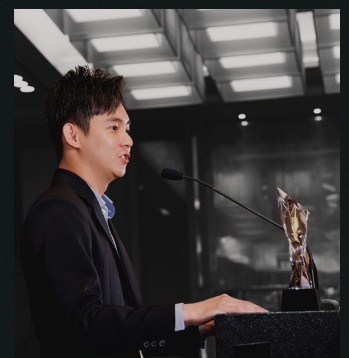

Why the ADS Awards?

- Position your organisation as an innovative leader in the region
- Showcase your company's activities and achievement in the past year
- Inspire oil & gas players to create better technologies/services
- Showcase outstanding innovation standards
- Gain individual and company recognition in the oil & gas industry
- Interact with industry players on issues of mutual interest
- Reward best practices and standards
- Recognise inspiring leaders and programmes
- Become a key contributor to the future development of the industry

Organisations and individuals (**Young Engineer** and **Female Engineer Awards** only) from the Asian Region are invited to submit entries for their chosen categories for the **ADS Awards**. There is no charge to enter the Awards. However, if your organisation is voted as a finalist by the Awards judges, your organisation must attend the **ADS Awards** ceremony and purchase delegate tickets to attend the conference.

You may wish to prepare senior executives to represent their organisations at the awards ceremony if you are shortlisted as a finalist.

Award Poster Guidelines

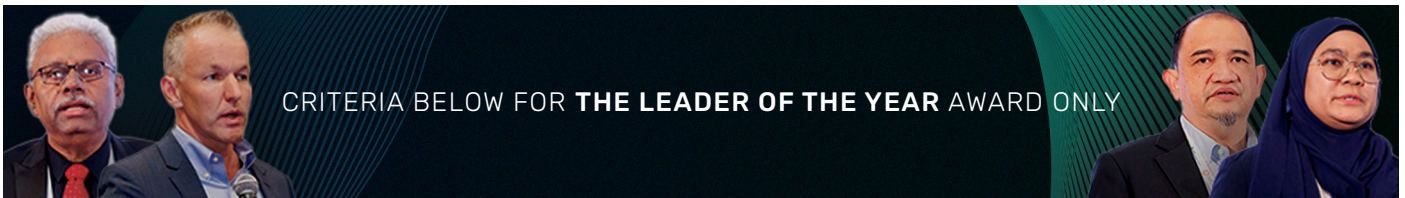

A1
PORTRAIT

- ✔ Background
- ✔ Objectives
- ✔ Methodology
- ✔ Results
- ✔ Conclusion
- ✔ Achieved Impact of the programme (if applicable)

CRITERIA FOR GRADING ARE AS FOLLOWS:

- How innovative the project or technology is
- If the technology has been proven, or is still being tested or in the planning stage
- How it will solve an important problem that will help the oil & gas industry
- How difficult it was from a technical or industry-change perspective
- How valuable the outcome is to the oil & gas industry

CRITERIA BELOW FOR **THE LEADER OF THE YEAR AWARD ONLY**

Disruptive Innovation Impact

Did they successfully promote ideas and lead projects that embodied new ways of thinking?

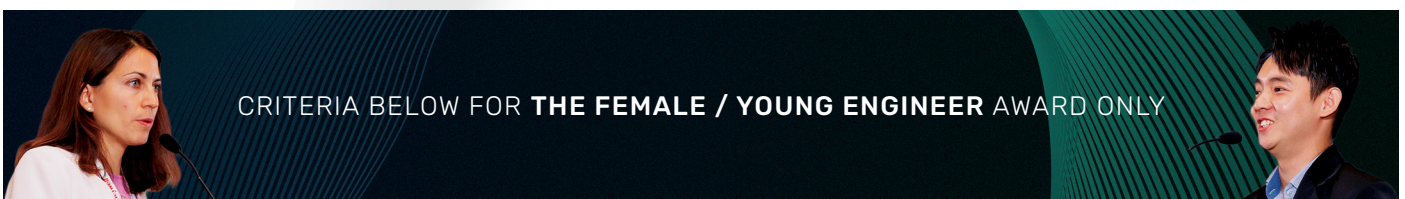

Collaborative Innovation Impact

Did they inspire others and play a significant role in creating new or unique organizational models, including cross-functional teams, that took a collaborative approach to solving problems or creating new ways of doing things?

Social Impact

Did they enhance the perception of the industry's value for other potential next-generation leaders?

CRITERIA BELOW FOR **THE FEMALE / YOUNG ENGINEER AWARD ONLY**

Leadership Experience

This could be in the nominee leading her team or a group of individuals in achieving a goal through work or volunteering in community or outreach programmes.

Teamwork Experience

The nominee should have examples of being collaborative, encouraging people to work together and working with others to achieve successful outcomes.

Professional Commitment

The nominee should have evidence showing commitment to a medium-term project or role, and a clear drive and ambition to continue developing and enhancing knowledge and skills.
